CBC-LOK

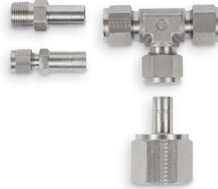

CS-LOK

TUBE FITTINGS

CBC-LOK tube fittings are fully interchangeable with Swagelok and Parker A-LOK.

CS-LOK fittings are fully interchangeable with Parker CPI

TUBE ADAPTERS

Designed for use with standard fittings to provide quick leak-tight connections in vacuum or pressure systems

GENERAL PURPOSE VALVES

GP series valves are a cost effective solution for instrument isolation and general purpose shut-off applications

BALL VALVES

3 piece ball valves have swing-out design for in-line repair

HP series valves are designed for shut-off applications with bi-directional flow

PLUG VALVES

Offer low torque, quarter-turn operation in a simple, compact design that provides positive shutoff of forward flow with up to 3000 psig (206 bar) pressure

NEEDLE VALVES

Integral bonnet needle valves for general flow control applications

Screwed bonnet needle valves for general flow applications

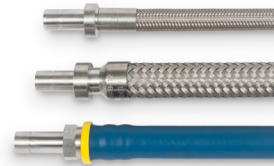

QUICK CONNECTS

With redundant o-ring seals that provide quick leak-tight connections in vacuum or pressure systems

PIPE FITTINGS

Instrumentation fittings meet applicable ASTM or ASME specs with threads which meet or exceed ANSI/ASME b1.20.1 requirements.

HOSE PRODUCTS

- Teflon lined
- Flexible metal
- Multipurpose push-on
- Hose connectors
